

CSCU PRESENTS

ACE THE BEHAVIOURAL INTERVIEW

CAMPUS RECRUITER PANEL & NETWORKING SESSION

Friday, January 29, 6:00PM

What?

This event will dig deep into the how-tos of behavioural interviews. We will have campus recruiters from Bell, BMO, IBM, and LinkedIn here to answer questions and describe the ideal candidate. An opportunity to network and land your next co-op internship comes along with this workshop!

Why?

There is more to CS position interviews than a resume, cover letter, and technical assessment. Us computer science students hardly get trained in the soft skills side of co-op/internship hunting. Being able to accurately express your ideas to hiring managers are equally as important as honing your technical expertise. Through this workshop, we wish to provide you with a solid idea on how these behavioural interviews work and how to ace them at your next interview.
